

CricketHub — UI Enhancement & Scoring Engine Architecture

Overview

This document defines the production-grade UI enhancement architecture for CricketHub. The platform is designed as a premium cricket analytics and live scoring ecosystem inspired by modern sports broadcasting systems and Apple-style minimalist product design.

Core goals:

- Professional scoring engine
 - Real-time operational workflows
 - Analytics-first UI
 - Responsive scoring dashboard
 - Modular reusable component system
-

Scoring Console Enhancements

Main improvements:

- Larger score, over, and run-rate visibility
 - Unified extras workflow
 - Addition of Scorecard tab
 - Addition of Commentary tab
 - Responsive recent deliveries timeline
 - Undo / Redo support
 - Reset confirmation workflow
 - Record Ball finalization workflow
 - Others popup (7, 8, Penalty Runs)
 - Strike change logic
 - Over-end bowler replacement flow
-

Scoring Tabs

Tabs inside scoring console:

1. Scoring
2. Scorecard
3. Commentary

Scorecard includes:

- Batting table
- Bowling table
- Expandable ball-by-ball progression

Commentary includes:

- Live narration
 - Over summaries
 - Wicket commentary
 - Timeline feed
-

Extras Logic

No Ball:

- Adds 1 automatic extra
- Allows additional runs
- Ball remains illegal

Wide:

- Adds 1 automatic extra
- Additional runs count as extras

Leg Bye / Bye:

- No automatic extra run
 - Runs added manually
 - Legal delivery counts
-

Wicket Workflow

Workflow:

1. Select batter out
2. Select dismissal type
3. Select fielders if needed
4. Select next batsman
5. Record Ball

Supported dismissals:

- Bowled
 - LBW
 - Caught
 - Run Out
 - Stumped
 - Hit Wicket
 - Timed Out
-

Match Setup Workflow

Step 1 — Team Selection

- Select Team A
- Select Team B

Step 2 — Playing XI

- Select playing squad
- Assign captain
- Assign wicketkeeper

Step 3 — Toss

- Toss winner
- Bat/Bowl decision

Step 4 — Match Settings

- Match Type
- Overs
- Overs Per Bowler
- Venue
- Ground
- Country
- Wagon Wheel
- Name Display

Step 5 — Match Start

- Select striker
 - Select non-striker
 - Select opening bowler
-

Match Overview Module

Screens:

- Summary
- Scorecard
- Commentary
- Stats
- Table
- More Matches

Stats include:

- Winning probability
 - Head-to-head analysis
 - Venue analysis
 - Recent form
-

Admin Dashboard Enhancements

Features:

- Assign scorer
 - Team roster management
 - Player statistics
 - Venue analytics
 - Search existing player
 - Create new player
 - Team last matches
 - Analysis visualization screen
-

Analytics Engine

Visualizations:

- Wagon Wheel
- Manhattan Graph
- Run Rate Graph
- Partnership Graph
- Bowling Heatmap
- Win Probability Curve

The analytics experience should feel cinematic, responsive, and broadcast-grade.

Final Product Goal

CricketHub should evolve into:

- A professional cricket operating system
- A live scoring ecosystem
- A sports analytics intelligence platform
- A premium responsive dashboard product

The interface should feel:

- cinematic
 - modern
 - premium
 - immersive
-
